Art Unit: 1714

Notes new examiner, and the office action is being sent out again with new clock since the previous action was sent to the wrong address.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-8 and 39 are rejected under 35 U.S.C. 103(a) as obvious over Kishida et al (JP 59-38253A).

Rejection is maintained for reason of record with following response.

Applicant asserts unexpected result based on fig. 1, however, a nature of monomeric compositions used in said fig. 1 is not taught. Thus, it is unclear what polymer particles are used. Also, scope of claims is broader than such showing even if it had any probative value. With respect to claim 39, an invention in a product-by-process is a product, not a process. See In re Brown, 459 F2d 531, 173 USPQ 685 (CCPA 1972) and In re Thorpe, 777 F2d 695, 697, 227 USPQ 964 (Fed. Cir. 1985).

Claims 1, 3-8 and 20-39 are rejected under 35 U.S.C. 103(a) as obvious over Kishida et al (JP 59-38253A) in view of Buser et al (US 4,159,301).

Rejection is maintained for reason of record and of above with following response.

Art Unit: 1714

Applicant asserts that Kishida et al teach melt mixing of two preformed polymer, and thus neither Kishida et al nor Buser et al suggests the instant method. However, Buser et al teach advantage of using a syrup (good viscosity control) as pointed out in previous rejection. Applicant failed to rebut the combination of references. Also, there is no showing of unexpected result of claimed method.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
